

SOLTECH

# TheFuture of Autonomous Digital Solutions

## Executive Summary

Soltech 247 is a global software development company specializing in turning complex, manual business operations into highly efficient, intelligent, and scalable digital systems. With over 08 years of specialized experience, we empower organizations worldwide by leveraging cutting-edge Agentic AI, robust web applications, and powerful automation solutions. We don't just build software; we engineer digital transformation that delivers measurable business impact—from 10x process efficiency to launching new million-dollar SaaS products.

# Our Foundation Mission & Core Values

## Our Mission

To transform client operations into autonomous, intelligent, and hyper-efficient digital ecosystems, allowing businesses to refocus resources from manual tasks to strategic growth.

## Core Values

- **Impact:** We measure our success by the quantifiable results we deliver, focusing on efficiency gains and revenue growth for our clients.
- **Innovation:** We remain at the forefront of technology, specializing in next-generation solutions like Agentic AI to solve problems before they become bottlenecks.
- **Reliability:** Built on seven years of global experience, our solutions are engineered for stability, security, and enterprise-grade performance.

# Core Service Offerings

## 1. Agentic AI Development

We build autonomous, goal-driven AI agents that use LLMs to reason, plan, and execute complex business tasks across software environments. They automate multi-step workflows with minimal oversight, enabling autonomous process optimization, intelligent data orchestration, and real-time decision-making.

## 2. Web Application Development

We design and build custom, scalable web platforms, internal portals, and Software-as-a-Service (SaaS) products. Our focus is on intuitive UI/UX coupled with rock-solid architecture to ensure your application performs flawlessly under heavy loads and is designed for future expansion.

## 3. Web Automations & Integrations

We replace repetitive, time-consuming tasks with smart, reliable automation workflows. Our expertise lies in seamlessly integrating disparate systems, databases, and third-party tools (like Google Drive, Sheets, and specialized APIs) to create unified and instantaneous data flow.

## 4. Website Development (High-Performance)

We deliver modern, performance-optimized websites and digital presences, focusing on speed, mobile responsiveness, and clean code that drives user engagement and conversion.

## 5. Shopify Development & Custom E-commerce Solutions

Specializing in the Shopify ecosystem, we provide custom theme development, headless e-commerce builds, and complex app integrations necessary for high-volume retailers to scale without technical limits.

## 6. Graphic designing

Specializing in modern visual communication, we create brand identities, marketing assets, and custom graphics that enhance audience engagement and give businesses a polished, professional presence across all platforms.

## 7. SEO

Focused on performance-driven SEO, we optimize website structure, content, and authority to improve search rankings, increase organic traffic, and ensure long-term visibility in competitive markets.

## 8. Digital Marketing

Experts in multi-channel digital marketing, we craft targeted campaigns across social media, search, and email that help brands build awareness, generate quality leads, and drive measurable growth.

# Digital Solutions Portfolio

Our portfolio reflects our expertise in building, launching, and scaling modern digital solutions across platforms like Shopify, WordPress, Wix, and Squarespace.

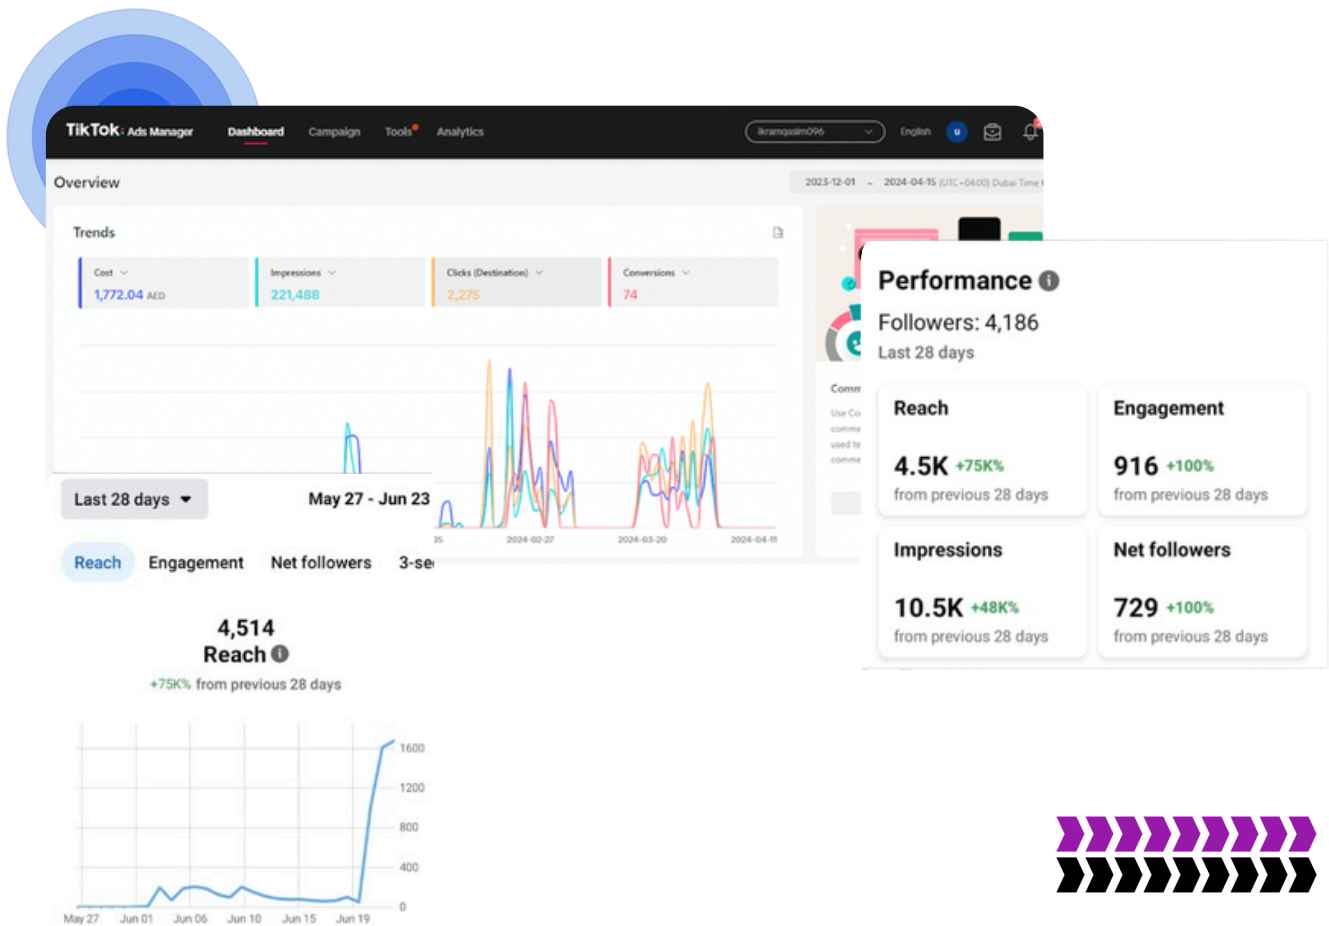

## Social Media Ads Strategy

### Core Functionality

A data-driven social media advertising strategy designed to target the right audience, maximize engagement, and generate high-quality leads and sales across platforms like Facebook, Instagram, and Tik Tok.

### Expertise Demonstrated

Social Media Advertising, Audience Targeting, Campaign Optimization, Performance Marketing.

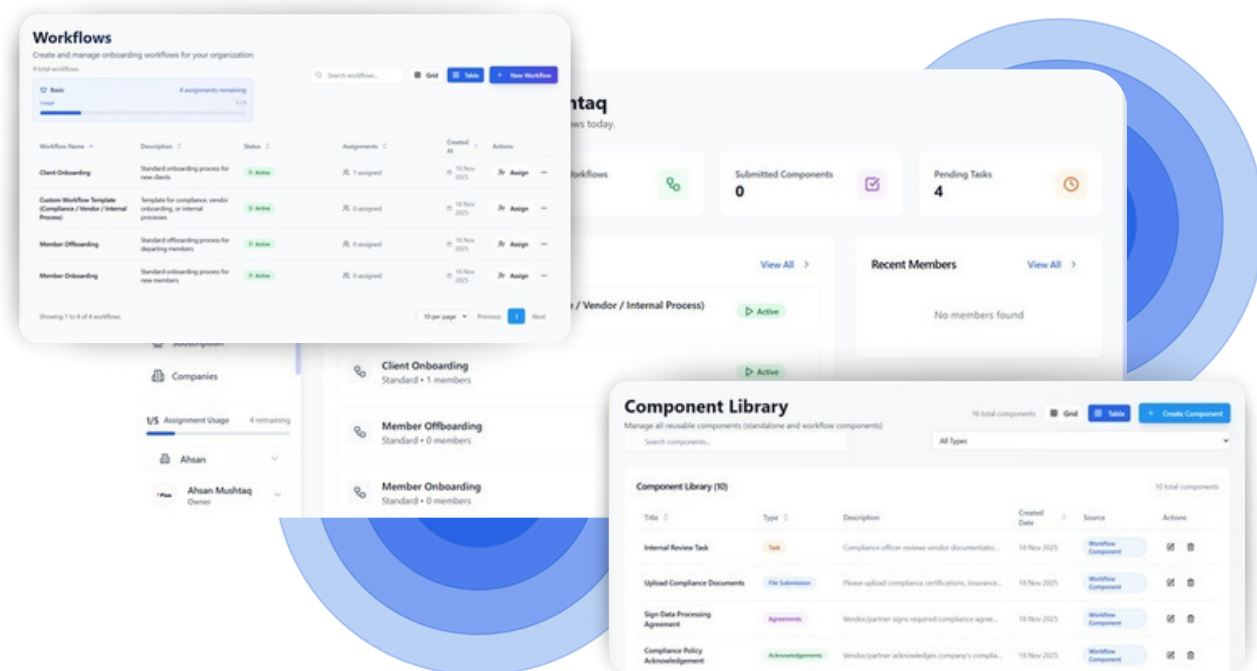

## Core Functionality

A workflow management SaaS platform allowing organizations to define and assign structured internal processes (e.g., employee onboarding, client KYC) to users on demand.

## Expertise Demonstrated

Workflow Automation, Process Management, SaaS Development

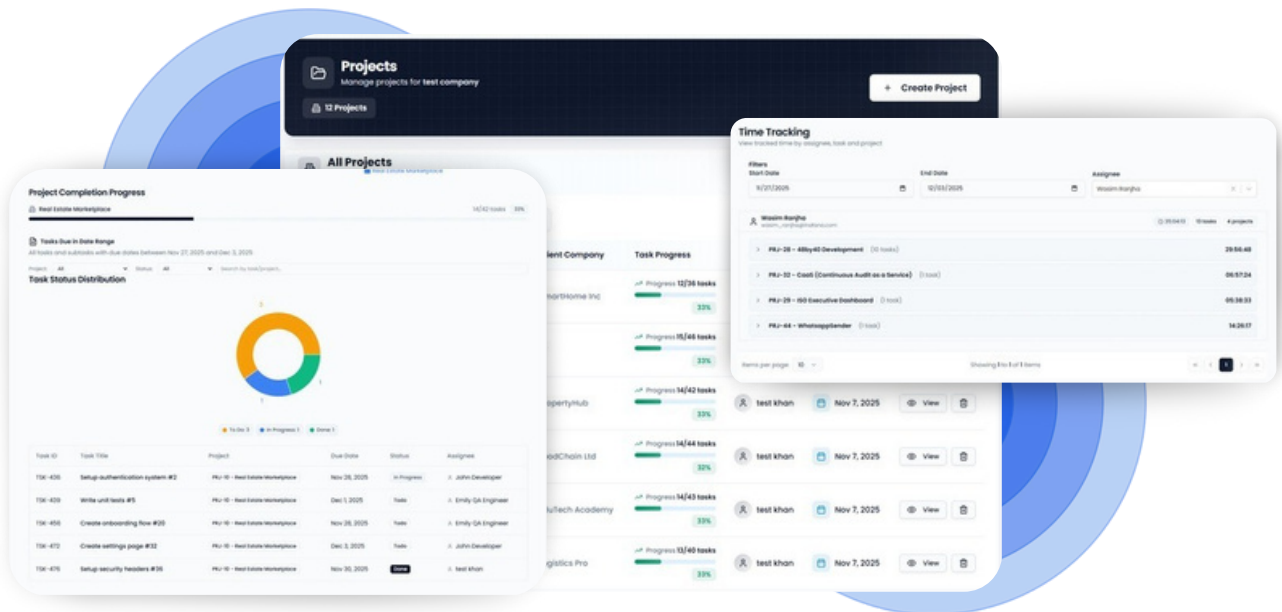

## Core Functionality

A collaborative SaaS web application designed to facilitate seamless communication and management between agencies and their clients across multiple active projects.

## Expertise Demonstrated

Project Management, Collaboration Tools, Web Application

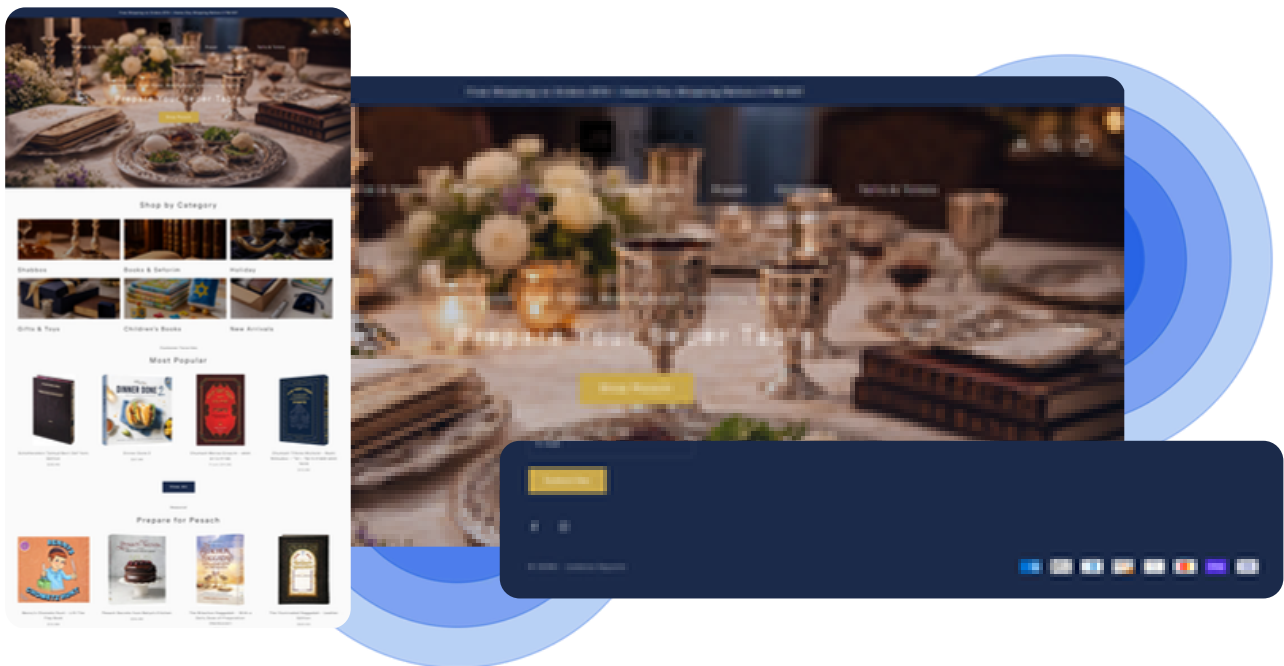

## Shopify Store Development

### Core Functionality

A high-performance Shopify website development service designed to create fast, secure, and conversion-focused eCommerce stores that drive sales and business growth.

### Expertise Demonstrated

Shopify Development, eCommerce Solutions, Conversion Optimization

## Full Stack Development

### Core Functionality

A comprehensive full-stack development solution delivering scalable, high-performance applications with seamless front-end and back-end integration for efficient business operations.

### Expertise Demonstrated

Full-Stack Development, Backend Architecture, Frontend Development, API Integration.

# Featured Success Stories (Delivering Quantifiable Impact)

Our 7+ years of experience are defined by the success of our partners. We specialize in taking manual, painful processes and transforming them into automated advantages.

## **Client: Prescient Security (US)**

### **Challenge**

Manual SOC 2 compliance testing and report generation using complex, time-consuming spreadsheets.

### **Solution**

Developed a custom web application that automated testing validation and instantly generated audit-ready compliance reports.

### **Quantifiable Impact**

10x Efficiency Boost in reporting, reducing manual effort and directly contributing to the client's growth into a million-dollar company.

## Client: Topshot Pro

### Challenge

Need to provide real estate professionals with a fast, modern tool to create sophisticated property presentations on the go.

### Solution

Built a custom, AI-driven SaaS web application that allows users to instantly generate high-quality listing presentations via a mobile-friendly interface.

### Quantifiable Impact

10x Efficiency Boost in reporting, reducing manual effort and directly contributing to the client's growth into a million-dollar company.

## Client: NRS

### Challenge

Field teams were manually recording sample collections and instrument readings, leading to data silos and storage management issues.

### Solution

Engineered a responsive, mobile-first web application that allows field users to report data via cell phones, centralizing all readings in real-time.

### Quantifiable Impact

Digitized all field data collection, enabling central storage and management for the client's customers, eliminating manual errors and delays.

# Client: Beyond house Cleaning

## Challenge

Management lacked a unified, real-time view of company performance due to dispersed employee stat submissions via unintegrated methods.

## Solution

Created a secure internal portal where employees submit stats, which the web application then aggregates and instantly calculates cumulative, actionable statistics.

## Quantifiable Impact

Centralized operational intelligence, providing management with clear, unified performance data for better strategic decision-making.
